Small Bore
Solutions

SMALL BORE

The Peak of Luxury

As Baldwin continues to strengthen its position in the luxury space, we are expanding our small bore offering to support more refined and design-driven applications. With a growing portfolio of small bore roses and newly engineered adapters for 1.5" bore preparations, Baldwin delivers the same trusted turning power and lever stability- now in a more tailored, elevated solution.

Introducing

1.5" Small Bore Adaptors

ADAPTOR

A more minimal hardware footprint brings a heightened sense of refinement to the door look. Engineered for precision installations, small bore adaptors allow Baldwin hardware to perform within a 1.5" bore configuration without compromising strength or stability. By reinforcing the connection point within the door, they preserve the smooth operation and lever integrity synonymous with Baldwin.
